

Sheep Tumor Necrosis FactorgammaReceptor ELISA Kit | TNF-gammaR elisa kit

Sheep Tumor Necrosis FactorgammaReceptor ELISA Kit

CATALOG #
AAA90612

REACTIVITY
Sheep

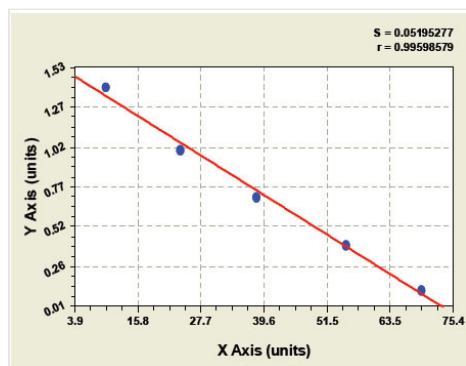

PRODUCT SYNONYMS

Tumor Necrosis FactorgammaReceptor; Sheep Tumor Necrosis FactorgammaReceptor ELISA Kit; Sheep Tumor Necrosis FactorgReceptor ELISA Kit; TNF-gammaR elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Sheep
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Sensitivity	0.1 ng/mL.
Intended Uses	This TNF-gammaR ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Sheep TNF-gammaR. This ELISA kit for research use only, not for therapeutic applications!
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for TNF-gammaR elisa kit

Principle of the Assay: TNF-gammaR ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-TNF-gammaR antibody and an TNF-gammaR-HRP conjugate. The assay sample and buffer are incubated together with TNF-gammaR-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the TNF-gammaR concentration since TNF-gammaR from samples and TNF-gammaR-HRP conjugate compete for the anti-TNF-gammaR antibody binding site. Since the number of sites is limited, as more sites are occupied by TNF-gammaR from the sample, fewer sites are left to bind TNF-gammaR-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The TNF-gammaR concentration in each sample is interpolated from this standard curve.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
