

Goat Podoplanin ELISA Kit | PDPN elisa kit

Goat Podoplanin ELISA Kit

CATALOG #
AAA90874

REACTIVITY
Goat

PRODUCT SYNONYMS

Podoplanin; Goat Podoplanin ELISA Kit; PDPN elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Goat
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Sensitivity	1.0 ng/dl.
Preparation and Storage	Store all reagents at 2-8 degree C

ADDITIONAL INFORMATION

Related Product Information for PDPN elisa kit

Intended Uses: This PDPN ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Goat PDPN. This ELISA kit for research use only!

Principle of the Assay: PDPN ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-PDPN antibody and an PDPN-HRP conjugate. The assay sample and buffer are incubated together with PDPN-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the PDPN concentration since PDPN from samples and PDPN-HRP conjugate compete for the anti-PDPN antibody binding site. Since the number of sites is limited, as more sites are occupied by PDPN from the sample, fewer sites are left to bind PDPN-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The PDPN concentration in each sample is interpolated from this standard curve.

Cardiovascular

NCBI AND UNIPROT INFORMATION

NCBI GI #	21666312
NCBI Official Full Name	podoplanin

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
