

## Chicken CarbohydRate Antigen 125 ELISA Kit | CA125 elisa kit

Chicken CarbohydRate Antigen 125 ELISA Kit

CATALOG #  
**AAA90894**

REACTIVITY  
**Chicken**

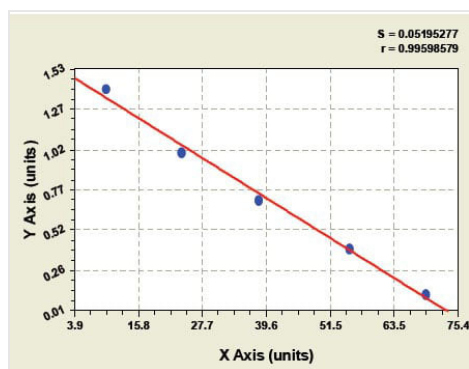

### PRODUCT SYNONYMS

CarbohydRate Antigen 125; Chicken CarbohydRate Antigen 125 ELISA Kit; CA125 elisa kit

### PRODUCT SPECIFICATIONS

|                         |                                                                                                                                                                                            |
|-------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Reactivity              | Chicken                                                                                                                                                                                    |
| Samples                 | Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate                                                                                                                 |
| Assay Type              | Competitive                                                                                                                                                                                |
| Sensitivity             | 0.1 ng/mL.                                                                                                                                                                                 |
| Intended Uses           | This CA125 ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Chicken CA125. This ELISA kit for research use only, not for therapeutic applications! |
| Preparation and Storage | Store all reagents at 2-8 degree C.                                                                                                                                                        |

### ADDITIONAL INFORMATION

#### Related Product Information for CA125 elisa kit

**Principle of the Assay:** CA125 ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-CA125 antibody and an CA125-HRP conjugate. The assay sample and buffer are incubated together with CA125-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the CA125 concentration since CA125 from samples and CA125-HRP conjugate compete for the anti-CA125 antibody binding site. Since the number of sites is limited, as more sites are occupied by CA125 from the sample, fewer sites are left to bind CA125-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The CA125 concentration in each sample is interpolated from this standard curve.
