

Sheep Inhibitor k Binding ELISA Kit | IKB elisa kit

Sheep Inhibitor k Binding ELISA Kit

CATALOG #
AAA90943

REACTIVITY
Sheep

PRODUCT SYNONYMS

Inhibitor k Binding; Sheep Inhibitor k Binding ELISA Kit; IKB elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Sheep
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Assay Type	Quantitative Competitive
Sensitivity	1.0 pg/mL.
Preparation and Storage	Store all reagents at 2-8 degree C.

Intended Uses: This INHKBELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Sheep INHKB. This ELISA kit for research use only!

Principle of the Assay: INHKBELISA kit applies the competitive enzyme immunoassay technique utilizing a polyclonal anti-INHKBantibody and an INHKB-HRP conjugate. The assay sample and buffer are incubated together with INHKB-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the INHKBconcentration since INHKBfrom samples and INHKB-HRP conjugate compete for the anti-INHKBantibody binding site. Since the number of sites is limited, as more sites are occupied by INHKBfrom the sample, fewer sites are left to bind INHKB-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The INHKBconcentration in each sample is interpolated from this standard curve.
