

Sheep Transforming growth factor receptor ELISA Kit | TGFR elisa kit

Sheep Transforming growth factor receptor ELISA Kit

CATALOG #
AAA91188

REACTIVITY
Sheep

PRODUCT SYNONYMS

Transforming growth factor receptor; Sheep Transforming growth factor receptor ELISA Kit; TGFR elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Sheep
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Sensitivity	0.1 ng/mL.
Intended Uses	This TGFR ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Sheep TGFR. This ELISA kit for research use only, not for therapeutic applications!
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for TGFR elisa kit

Principle of the Assay: TGFR ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-TGFR antibody and an TGFR-HRP conjugate. The assay sample and buffer are incubated together with TGFR-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the TGFR concentration since TGFR from samples and TGFR-HRP conjugate compete for the anti-TGFR antibody binding site. Since the number of sites is limited, as more sites are occupied by TGFR from the sample, fewer sites are left to bind TGFR-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The TGFR concentration in each sample is interpolated from this standard curve.
