Porcine Anti-liver cytosol antibody type 1 ELISA Kit | LC1 elisa kit

Porcine Anti-liver cytosol antibody type 1 ELISA Kit

CATALOG #	REACTIVITY
AAA91210	**Porcine**

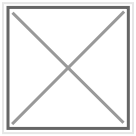

PRODUCT SYNONYMS

Anti-liver cytosol antibody type 1; Porcine Anti-liver cytosol antibody type 1 ELISA Kit; LC1 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Porcine
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Sensitivity	0.1 ng/mL
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for LC1 elisa kit	**Intended Uses:** This anti-LC1 ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Porcine anti-LC1. This ELISA kit for research use only! **Principle of the Assay:** anti-LC1 ELISA kit applies the competitive enzyme immunoassay technique utilizing LC1 antigen and an anti-LC1-HRP conjugate. The assay sample and buffer are incubated together with anti-LC1-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the anti-LC1 concentration since anti-LC1 from samples and anti-LC1-HRP conjugate compete for the LC1 antigen binding site. Since the number of sites is limited, as more sites are occupied by anti-LC1 from the sample, fewer sites are left to bind anti-LC1-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The anti-LC1 concentration in each sample is interpolated from this standard curve.
Product Categories/Family for LC1 elisa kit	Cell Biology

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
