

Goat Kinase insert Domain Receptor/VEGFR2 ELISA Kit | KDR elisa kit

Goat Kinase insert Domain Receptor/VEGFR2 ELISA Kit

CATALOG #
AAA91231

REACTIVITY
Goat

PRODUCT SYNONYMS

Kinase insert Domain Receptor/VEGFR2; Goat Kinase insert Domain Receptor/VEGFR2 ELISA Kit; KDR elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Goat
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Sensitivity	0.1 ng/mL.
Preparation and Storage	Store all reagents at 2-8 degree C

For samples: Serum, plasma, cell culture supernatants, body fluid and tissue homogenate

INTENDED USE This KDR ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Goat KDR. This ELISA kit for research use only!

PRINCIPLE OF THE ASSAY KDR ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-KDR antibody and an KDR-HRP conjugate. The assay sample and buffer are incubated together with KDR-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the KDR concentration since KDR from samples and KDR-HRP conjugate compete for the anti-KDR antibody binding site. Since the number of sites is limited, as more sites are occupied by KDR from the sample, fewer sites are left to bind KDR-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The KDR concentration in each sample is interpolated from this standard curve.
