

Chicken alpha Melanocyte Stimulating Hormone ELISA Kit | alpha-MSH elisa kit

Chicken alpha Melanocyte Stimulating Hormone ELISA Kit

CATALOG #
AAA91242

REACTIVITY
Chicken

PRODUCT SYNONYMS

alpha Melanocyte Stimulating Hormone; Chicken alpha Melanocyte Stimulating Hormone ELISA Kit; Chicken a Melanocyte Stimulating Hormone ELISA Kit; alpha-MSH elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Chicken
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Sensitivity	1.0 pg/mL.
Intended Uses	This alpha-MSH ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Chicken alpha-MSH. This ELISA kit for research use only, not for therapeutic applications!
Preparation and Storage	Store all reagents at 2-8 degree C

ADDITIONAL INFORMATION

Related Product Information for alpha-MSH elisa kit

Principle of the assay: alpha-MSH ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-alpha-MSH antibody and an alpha-MSH-HRP conjugate. The assay sample and buffer are incubated together with alpha-MSH-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the alpha-MSH concentration since alpha-MSH from samples and alpha-MSH-HRP conjugate compete for the anti-alpha-MSH antibody binding site. Since the number of sites is limited, as more sites are occupied by alpha-MSH from the sample, fewer sites are left to bind alpha-MSH-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The alpha-MSH concentration in each sample is interpolated from this standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	269979223
NCBI Official Full Name	alpha-melanocyte-stimulating hormone

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
