

Sheep Adipocyte Fatty Acid Binding Protein ELISA Kit | A-FABP elisa kit

Sheep Adipocyte Fatty Acid Binding Protein ELISA Kit

CATALOG #
AAA91284

REACTIVITY
Sheep

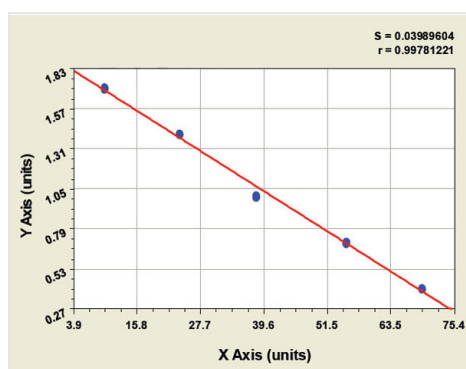

PRODUCT SYNONYMS

Adipocyte Fatty Acid Binding Protein; Sheep Adipocyte Fatty Acid Binding Protein ELISA Kit; A-FABP elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Sheep
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Sensitivity	0.1 ng/mL.
Intended Uses	This A-FABP ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Sheep A-FABP. This ELISA kit for research use only, not for therapeutic applications!
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for A-FABP elisa kit

Principle of the Assay: A-FABP ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-A-FABP antibody and an A-FABP-HRP conjugate. The assay sample and buffer are incubated together with A-FABP-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the A-FABP concentration since A-FABP from samples and A-FABP-HRP conjugate compete for the anti-A-FABP antibody binding site. Since the number of sites is limited, as more sites are occupied by A-FABP from the sample, fewer sites are left to bind A-FABP-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The A-FABP concentration in each sample is interpolated from this standard curve.

Product Categories/Family for A-FABP elisa kit

Cardiovascular

NCBI AND UNIPROT INFORMATION

NCBI GI #	163570752
Molecular Weight	3,816 Da
NCBI Official Full Name	A-FABP, partial
UniProt Protein Name	A-FABP
UniProt Entry Name	A9YWQ7_ANAPL

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
