

Monkey Apolipoprotein E ELISA Kit | APOE elisa kit

Monkey Apolipoprotein E ELISA Kit

CATALOG #
AAA91303

REACTIVITY
Monkey

PRODUCT SYNONYMS

Apolipoprotein E; Monkey Apolipoprotein E ELISA Kit; APOE elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Monkey
Samples	Serum, Plasma, Cell Culture Supernatants, Body Fluid And Tissue Homogenate
Assay Type	Quantitative Competitive
Sensitivity	1.0 ng/mL.
Preparation and Storage	Store all reagents at 2-8 degree C.

Intended Uses: This ApoD ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Human ApoD. This ELISA kit for research use only!

Principle of the Assay: ApoD ELISA kit applies the competitive enzyme immunoassay technique utilizing a polyclonal anti-ApoD antibody and an ApoD-HRP conjugate. The assay sample and buffer are incubated together with ApoD-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the ApoD concentration since ApoD from samples and ApoD-HRP conjugate compete for the anti-ApoD antibody binding site. Since the number of sites is limited, as more sites are occupied by ApoD from the sample, fewer sites are left to bind ApoD-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The ApoD concentration in each sample is interpolated from this standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	4557325
NCBI GeneID	348
NCBI Accession #	NP_000032.1
NCBI GenBank Nucleotide #	NM_000041.2
Molecular Weight	36,154 Da
NCBI Official Full Name	apolipoprotein E
NCBI Official Synonym Full Names	apolipoprotein E
NCBI Official Symbol	APOE
NCBI Official Synonym Symbols	AD2; LPG; LDLCQ5
NCBI Protein Information	apolipoprotein E; apo-E; apolipoprotein E3
UniProt Protein Name	Apolipoprotein E
UniProt Gene Name	APOE
UniProt Synonym Gene Names	Apo-E
UniProt Entry Name	APOE_HUMAN

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
