

Monkey E2/ubiquitin-conjugating enzyme ELISA Kit | E2/UBCE elisa kit

Monkey E2/ubiquitin-conjugating enzyme ELISA Kit

CATALOG #
AAA91363

REACTIVITY
Monkey

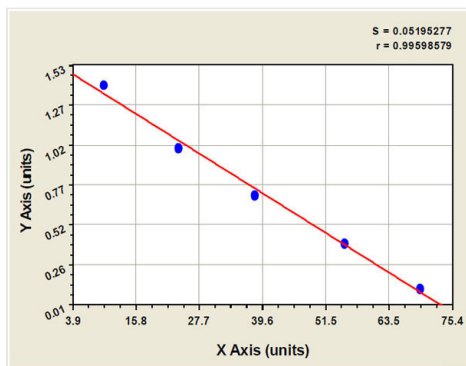

PRODUCT SYNONYMS

E2/ubiquitin-conjugating enzyme; Monkey E2/ubiquitin-conjugating enzyme ELISA Kit; E2/UBCE elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Monkey
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Detection Range	1.0-25ng/mL
Sensitivity	0.1ng/mL
Intended Uses	This E2/UBCE ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Monkey E2/UBCE. This ELISA kit for research use only, not for therapeutic applications!
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for E2/UBCE elisa kit

Principle of the assay: E2/UBCE ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-E2/UBCE antibody and an E2/UBCE-HRP conjugate. The assay sample and buffer are incubated together with E2/UBCE-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the E2/UBCE concentration since E2/UBCE from samples and E2/UBCE-HRP conjugate compete for the anti-E2/UBCE antibody binding site. Since the number of sites is limited, as more sites are occupied by E2/UBCE from the sample, fewer sites are left to bind E2/UBCE-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The E2/UBCE concentration in each sample is interpolated from this standard curve.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
