Goat Anti-alpha-Fodrin IgG/IgA ELISA Kit | A-Fodrin IgG/IgA elisa kit

Goat Anti-alpha-Fodrin IgG/IgA ELISA Kit

CATALOG #	REACTIVITY
AAA91382	**Goat**

PRODUCT SYNONYMS

Anti-alpha-Fodrin IgG/IgA; Goat Anti-alpha-Fodrin IgG/IgA ELISA Kit; A-Fodrin IgG/IgA elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Goat
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Sensitivity	1.0 U/mL.
Intended Uses	This A-Fodrin IgG/IgA ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Goat A-Fodrin IgG/IgA. This ELISA kit for research use only, not for therapeutic applications!
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for A-Fodrin IgG/IgA elisa kit	**Principle of the Assay:** A-Fodrin IgG/IgA ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-A-Fodrin IgG/IgA antibody and an A-Fodrin IgG/IgA-HRP conjugate. The assay sample and buffer are incubated together with A-Fodrin IgG/IgA-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the A-Fodrin IgG/IgA concentration since A-Fodrin IgG/IgA from samples and A-Fodrin IgG/IgA-HRP conjugate compete for the anti-A-Fodrin IgG/IgA antibody binding site. Since the number of sites is limited, as more sites are occupied by A-Fodrin IgG/IgA from the sample, fewer sites are left to bind A-Fodrin IgG/IgA-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The A-Fodrin IgG/IgA concentration in each sample is interpolated from this standard curve.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
