

Goat Transcription Factor P65 ELISA Kit | RELA elisa kit

Goat Transcription Factor P65 ELISA Kit

CATALOG #
AAA91606

REACTIVITY
Goat

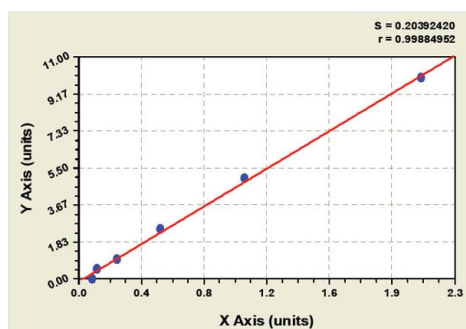

PRODUCT SYNONYMS

Transcription Factor P65; Goat Transcription Factor P65 ELISA Kit; RELA elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Goat
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Assay Type	Sandwich
Sensitivity	0.1 ng/mL.
Preparation and Storage	Store all reagents at 2-8 degree C

Related Product Information for RELA elisa kit

For samples: Serum, plasma, cell culture supernatants, body fluid and tissue homogenate

INTENDED USE This RELA ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Goat RELA. This ELISA kit for research use only!

PRINCIPLE OF THE ASSAY RELA ELISA kit applies the quantitative sandwich enzyme immunoassay technique. The microtiter plate has been pre-coated with a monoclonal antibody specific for RELA. Standards or samples are then added to the microtiter plate wells and RELA if present, will bind to the antibody pre-coated wells. In order to quantitatively determine the amount of RELA present in the sample, a standardized preparation of horseradish peroxidase (HRP)-conjugated polyclonal antibody, specific for RELA are added to each well to "sandwich" the RELA immobilized on the plate. The microtiter plate undergoes incubation, and then the wells are thoroughly washed to remove all unbound components. Next, substrate solutions are added to each well. The enzyme (HRP) and substrate are allowed to react over a short incubation period. Only those wells that contain RELA and enzyme-conjugated antibody will exhibit a change in color. The enzyme-substrate reaction is terminated by addition of a sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450 nm. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The RELA concentration in each sample is interpolated from this standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	41407145
NCBI GeneID	2717869
NCBI Accession #	NP_959981.1
NCBI GenBank Nucleotide #	NC_002944.2
NCBI Official Full Name	RelA
NCBI Official Symbol	relA
NCBI Protein Information	RelA

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
