

Monkey Synuclein, Alpha ELISA Kit | SNCa elisa kit

Monkey Synuclein, Alpha ELISA Kit

CATALOG #
AAA91676

REACTIVITY
Monkey

PRODUCT SYNONYMS

Synuclein; Alpha; Monkey Synuclein; Alpha ELISA Kit; SNCa elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Monkey
Samples	Serum, Plasma, Cell Culture Supernatants, Body Fluid And Tissue Homogenate
Assay Type	Quantitative Sandwich
Sensitivity	1.0pg/mL.
Preparation and Storage	Store all reagents at 2-8 degree C

Intended Uses: This SNCOalpha ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Mouse SNCOalpha. This ELISA kit for research use only!

Principle of the Assay: SNCOalpha ELISA kit applies the quantitative sandwich enzyme immunoassay technique. The microtiter plate has been pre-coated with a monoclonal antibody specific for SNCOalpha. Standards or samples are then added to the microtiter plate wells and SNCOalpha if present, will bind to the antibody pre-coated wells. In order to quantitatively determine the amount of SNCOalpha present in the sample, a standardized preparation of horseradish peroxidase (HRP)-conjugated polyclonal antibody, specific for SNCOalpha are added to each well to "sandwich" the SNCOalpha immobilized on the plate. The microtiter plate undergoes incubation, and then the wells are thoroughly washed to remove all unbound components. Next, substrate solutions are added to each well. The enzyme (HRP) and substrate are allowed to react over a short incubation period. Only those wells that contain SNCOalpha and enzyme-conjugated antibody will exhibit a change in color. The enzyme-substrate reaction is terminated by addition of a sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450 nm. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The SNCOalpha concentration in each sample is interpolated from this standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	49456267
NCBI GeneID	6622
UniProt Accession #	P37840; Q13701; Q4JHI3; Q6IAU6; A8K2A4; Q4W5L2; Q6QBS3
Molecular Weight	14,460 Da
NCBI Official Full Name	SNCA
NCBI Official Synonym Full Names	synuclein, alpha (non A4 component of amyloid precursor)
NCBI Official Symbol	SNCA
NCBI Official Synonym Symbols	PD1; NACP; PARK1; PARK4
NCBI Protein Information	alpha-synuclein; synuclein alpha-140; non A-beta component of AD amyloid
UniProt Protein Name	Alpha-synuclein
UniProt Gene Name	SNCA
UniProt Synonym Gene Names	NACP; PARK1; NACP
UniProt Entry Name	SYUA_HUMAN

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
