

Monkey Pregnancy associated plasma protein A ELISA Kit | PAPP-A elisa kit

Monkey Pregnancy associated plasma protein A ELISA Kit

CATALOG #
AAA91730

REACTIVITY
Monkey

PRODUCT SYNONYMS

Pregnancy associated plasma protein A; Monkey Pregnancy associated plasma protein A ELISA Kit; PAPP-A elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Monkey
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Detection Range	2.5-50ng/mL
Sensitivity	0.1ng/mL
Intended Uses	This PAPP-A ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Monkey PAPP-A. This ELISA kit for research use only, not for therapeutic applications!
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for PAPP-A elisa kit

Principle of the assay: PAPP-A ELISA kit applies the quantitative sandwich enzyme immunoassay technique. The microtiter plate has been pre-coated with a monoclonal antibody specific for PAPP-A. Standards or samples are then added to the microtiter plate wells and PAPP-A if present, will bind to the antibody pre-coated wells. In order to quantitatively determine the amount of PAPP-A present in the sample, a standardized preparation of horseradish peroxidase (HRP)-conjugated polyclonal antibody, specific for PAPP-A are added to each well to "sandwich" the PAPP-A immobilized on the plate. The microtiter plate undergoes incubation, and then the wells are thoroughly washed to remove all unbound components. Next, substrate solutions are added to each well. The enzyme (HRP) and substrate are allowed to react over a short incubation period. Only those wells that contain PAPP-A and enzyme-conjugated antibody will exhibit a change in color. The enzyme-substrate reaction is terminated by addition of a sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450 nm. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The PAPP-A concentration in each sample is interpolated from this standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	71025082
Molecular Weight	23,055 Da
NCBI Official Full Name	pregnancy associated plasma protein A, partial
UniProt Protein Name	Pregnancy associated plasma protein A
UniProt Entry Name	Q45XF7_PIG

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
