

Sheep 11-dehydro-thromboxane B2 ELISA Kit | 11-DH-TXB2 elisa kit

Sheep 11-dehydro-thromboxane B2 ELISA Kit

CATALOG #
AAA91757

REACTIVITY
Sheep

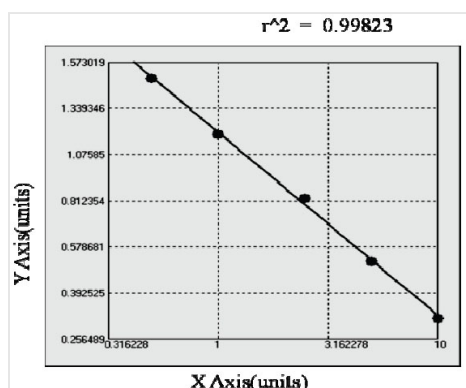

PRODUCT SYNONYMS

11-dehydro-thromboxane B2; Sheep 11-dehydro-thromboxane B2 ELISA Kit; 11-DH-TXB2 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Sheep
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Sensitivity	0.1 ng/mL.
Intended Uses	This 11-DH-TXB2 ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Sheep 11-DH-TXB2. This ELISA kit for research use only, not for therapeutic applications!
Preparation and Storage	Store all reagents at 2-8 degree C.

Principle of the Assay: 11-DH-TXB2 ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-11-DH-TXB2 antibody and an 11-DH-TXB2-HRP conjugate. The assay sample and buffer are incubated together with 11-DH-TXB2-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the 11-DH-TXB2 concentration since 11-DH-TXB2 from samples and 11-DH-TXB2-HRP conjugate compete for the anti-11-DH-TXB2 antibody binding site. Since the number of sites is limited, as more sites are occupied by 11-DH-TXB2 from the sample, fewer sites are left to bind 11-DH-TXB2-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The 11-DH-TXB2 concentration in each sample is interpolated from this standard curve.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
