

Chicken Serum Amyloid P Component ELISA Kit | SAP elisa kit

Chicken Serum Amyloid P Component ELISA Kit

CATALOG #
AAA91900

REACTIVITY
Chicken

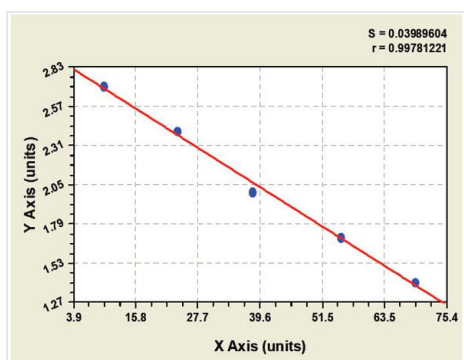

PRODUCT SYNONYMS

Serum Amyloid P Component; Chicken Serum Amyloid P Component ELISA Kit; SAP elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Chicken
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Sensitivity	1.0 ng/mL.
Preparation and Storage	Store all reagents at 2-8 degree C

ADDITIONAL INFORMATION

Related Product Information for SAP elisa kit

For samples: Serum, plasma, cell culture supernatants, body fluid and tissue homogenate

INTENDED USE This SAP ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Chicken SAP. This ELISA kit for research use only!

PRINCIPLE OF THE ASSAY SAP ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-SAP antibody and an SAP-HRP conjugate. The assay sample and buffer are incubated together with SAP-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the SAP concentration since SAP from samples and SAP-HRP conjugate compete for the anti-SAP antibody binding site. Since the number of sites is limited, as more sites are occupied by SAP from the sample, fewer sites are left to bind SAP-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The SAP concentration in each sample is interpolated from this standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	311779690
NCBI Official Full Name	Sap

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
