

Porcine Tartrate resistant acid phosphatase 5b ELISA Kit | TRACP-5b elisa kit

Porcine Tartrate resistant acid phosphatase 5b ELISA Kit

CATALOG #
AAA91998

REACTIVITY
Porcine

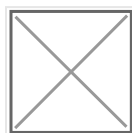

PRODUCT SYNONYMS

Tartrate resistant acid phosphatase 5b; Porcine Tartrate resistant acid phosphatase 5b ELISA Kit; TRACP-5b elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Porcine
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Sensitivity	0.1 ng/mL.
Intended Uses	This TRACP5B ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Porcine TRACP5B. This ELISA kit for research use only, not for therapeutic applications!
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for TRACP-5b elisa kit

Principle of the assay: TRACP5B ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-TRACP5B antibody and an TRACP5B-HRP conjugate. The assay sample and buffer are incubated together with TRACP5B-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the TRACP5B concentration since TRACP5B from samples and TRACP5B-HRP conjugate compete for the anti-TRACP5B antibody binding site. Since the number of sites is limited, as more sites are occupied by TRACP5B from the sample, fewer sites are left to bind TRACP5B-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The TRACP5B concentration in each sample is interpolated from this standard curve.
