

Bovine Anti-Insulin Receptor Antibody ELISA Kit | AIRA elisa kit

Bovine Anti-Insulin Receptor Antibody ELISA Kit

CATALOG # AAA92141	REACTIVITY Bovine
------------------------------	-----------------------------

PRODUCT SYNONYMS

Anti-Insulin Receptor Antibody; Bovine Anti-Insulin Receptor Antibody ELISA Kit; AIRA elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Bovine
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Sensitivity	1.0 ng/mL.
Intended Uses	This AIRA ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Bovine AIRA. This ELISA kit for research use only, not for therapeutic applications!
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for AIRA elisa kit	Principle of the Assay: AIRA ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-AIRA antibody and an AIRA-HRP conjugate. The assay sample and buffer are incubated together with AIRA-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the AIRA concentration since AIRA from samples and AIRA-HRP conjugate compete for the anti-AIRA antibody binding site. Since the number of sites is limited, as more sites are occupied by AIRA from the sample, fewer sites are left to bind AIRA-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The AIRA concentration in each sample is interpolated from this standard curve.
Product Categories/Family for AIRA elisa kit	Signal Transduction

NCBI AND UNIPROT INFORMATION

NCBI GI #	308153655
NCBI GeneID	3643
Molecular Weight	155,146 Da
NCBI Official Full Name	Insulin receptor
NCBI Official Synonym Full Names	insulin receptor
NCBI Official Symbol	INSR
NCBI Official Synonym Symbols	HHF5; CD220
NCBI Protein Information	insulin receptor; IR
UniProt Protein Name	Insulin receptor
UniProt Gene Name	INSR
UniProt Synonym Gene Names	IR
UniProt Entry Name	INSR_HUMAN

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
