

Sheep Matrix metalloproteinase 13 ELISA Kit | MMP-13 elisa kit

Sheep Matrix metalloproteinase 13 ELISA Kit

CATALOG #
AAA92191

REACTIVITY
Sheep

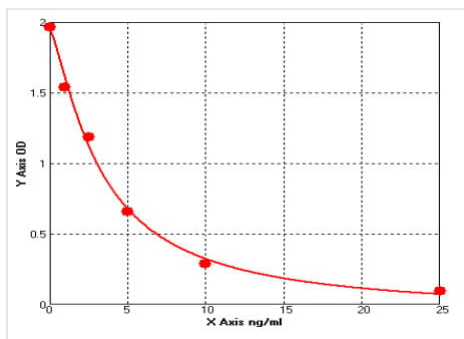

PRODUCT SYNONYMS

Matrix metalloproteinase 13; Sheep Matrix metalloproteinase 13 ELISA Kit; MMP-13 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Sheep
Specificity	This assay has high sensitivity and excellent specificity for detection of MMP-13. No significant cross-reactivity or interference between MMP-13 and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between MMP-13 and all the analogues, therefore, cross reaction may still exist in some cases.
Assay Type	Quantitative Competitive
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Sensitivity	0.1 ng/mL
Intended Uses	This MMP-13 ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Sheep MMP-13. This ELISA kit for research use only, not for therapeutic applications
Intended Uses	This MMP-13 ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Sheep MMP-13. This ELISA kit for research use only, not for therapeutic applications!
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for MMP-13 elisa kit	Principle of the Assay: MMP-13 ELISA kit applies the competitive enzyme immunoassay technique utilizing a polyclonal anti-MMP-13 antibody and an MMP-13-HRP conjugate. The assay sample and buffer are incubated together with MMP-13-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the MMP-13 concentration since MMP-13 from samples and MMP-13-HRP conjugate compete for the anti-MMP-13 antibody binding site. Since the number of sites is limited, as more sites are occupied by MMP-13 from the sample, fewer sites are left to bind MMP-13-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The MMP-13 concentration in each sample is interpolated from this standard curve. Intended Uses: This MMP-13 ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Sheep MMP-13. This ELISA kit for research use only, not for therapeutic or test applications!
Product Categories/Family for MMP-13 elisa kit	Cancer

NCBI AND UNIPROT INFORMATION

NCBI GI #	12584825
Molecular Weight	16,463 Da
NCBI Official Full Name	MMP-13, partial
UniProt Protein Name	MMP-13
UniProt Entry Name	Q9BGL6_SHEEP

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
