

Bovine Myosin ELISA Kit | MYS elisa kit

Bovine Myosin ELISA Kit

CATALOG #
AAA92321

REACTIVITY
Bovine

PRODUCT SYNONYMS

Myosin; Bovine Myosin ELISA Kit; MYS elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Bovine
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Sensitivity	1.0 ng/mL.
Intended Uses	This MYS ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Bovine MYS. This ELISA kit for research use only, not for therapeutic applications!
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for MYS elisa kit

Principle of the Assay: MYS ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-MYS antibody and an MYS-HRP conjugate. The assay sample and buffer are incubated together with MYS-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the MYS concentration since MYS from samples and MYS-HRP conjugate compete for the anti-MYS antibody binding site. Since the number of sites is limited, as more sites are occupied by MYS from the sample, fewer sites are left to bind MYS-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The MYS concentration in each sample is interpolated from this standard curve.

Cell Biology

NCBI AND UNIPROT INFORMATION

NCBI GI #	433663
UniProt Accession #	Q39160; Q9LNP7
Molecular Weight	172,908 Da
NCBI Official Full Name	myosin
UniProt Protein Name	Myosin-5
UniProt Gene Name	XI-1
UniProt Synonym Gene Names	MYA1; At1g17580; F1L3.28
UniProt Entry Name	MYO5_ARATH

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
