

Sheep Anti-double stranded DNA ELISA Kit | dsDNA elisa kit

Sheep Anti-double stranded DNA ELISA Kit

CATALOG #
AAA92358

REACTIVITY
Sheep

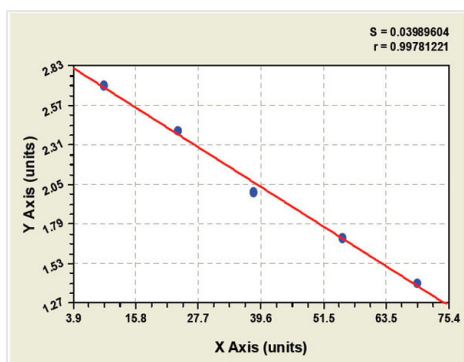

PRODUCT SYNONYMS

Anti-double stranded DNA; Sheep Anti-double stranded DNA ELISA Kit; dsDNA elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Sheep
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Sensitivity	1.0 IU/mL
Intended Uses	This anti-dsDNA ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Sheep anti-dsDNA. This ELISA kit for research use only, not for therapeutic applications!
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for dsDNA elisa kit

Principle of the Assay: anti-dsDNA ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-anti-dsDNA antibody and an anti-dsDNA-HRP conjugate. The assay sample and buffer are incubated together with anti-dsDNA-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the anti-dsDNA concentration since anti-dsDNA from samples and anti-dsDNA-HRP conjugate compete for the anti-anti-dsDNA antibody binding site. Since the number of sites is limited, as more sites are occupied by anti-dsDNA from the sample, fewer sites are left to bind anti-dsDNA-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The anti-dsDNA concentration in each sample is interpolated from this standard curve.
