

Chicken Granzymes A ELISA Kit | Gzms-A elisa kit

Chicken Granzymes A ELISA Kit

CATALOG #
AAA92413

REACTIVITY
Chicken

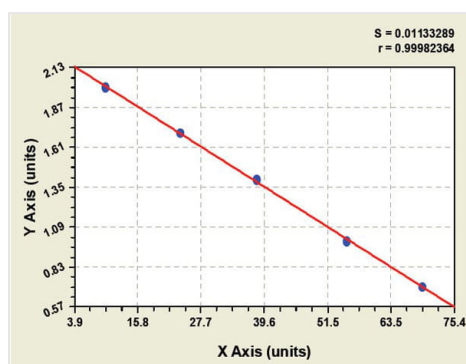

PRODUCT SYNONYMS

Granzymes A; Chicken Granzymes A ELISA Kit; Gzms-A elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Chicken
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Sensitivity	1.0 ng/mL.
Intended Uses	This GZMS-A ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Chicken GZMS-A. This ELISA kit for research use only, not for therapeutic applications!
Preparation and Storage	Store all reagents at 2-8 degree C

Principle of the Assay: GZMS-A ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-GZMS-A antibody and an GZMS-A-HRP conjugate. The assay sample and buffer are incubated together with GZMS-A-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the GZMS-A concentration since GZMS-A from samples and GZMS-A-HRP conjugate compete for the anti-GZMS-A antibody binding site. Since the number of sites is limited, as more sites are occupied by GZMS-A from the sample, fewer sites are left to bind GZMS-A-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The GZMS-A concentration in each sample is interpolated from this standard curve.
