

Canine Platelet activating factor ELISA Kit | PAF elisa kit

Canine Platelet activating factor ELISA Kit

CATALOG #
AAA92847

REACTIVITY
Canine

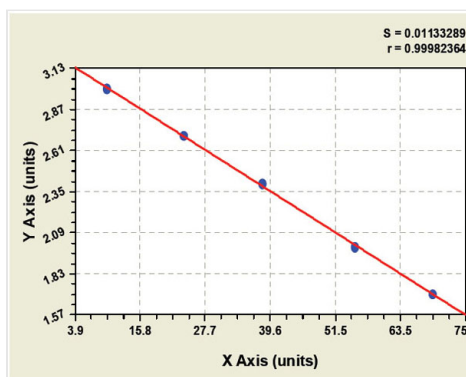

PRODUCT SYNONYMS

Platelet activating factor; Canine Platelet activating factor ELISA Kit; PAF elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Canine
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Detection Range	50-1000pg/mL
Sensitivity	1.0pg/mL
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for PAF elisa kit

Intended Uses: This PAF ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Canine PAF. This ELISA kit for research use only!

Principle of the Assay: PAF ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-PAF antibody and an PAF-HRP conjugate. The assay sample and buffer are incubated together with PAF-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the PAF concentration since PAF from samples and PAF-HRP conjugate compete for the anti-PAF antibody binding site. Since the number of sites is limited, as more sites are occupied by PAF from the sample, fewer sites are left to bind PAF-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The PAF concentration in each sample is interpolated from this standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	22537262
NCBI GeneID	1013908
NCBI Accession #	NP_688113.1
NCBI GenBank Nucleotide #	NC_004116.1
NCBI Official Full Name	platelet activating factor
NCBI Official Symbol	SAG1104
NCBI Protein Information	platelet activating factor

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
