

Monkey Platelet endothelial cell adhesion molecule-1 ELISA Kit | PECAM-1/CD31 elisa kit

Monkey Platelet endothelial cell adhesion molecule-1 ELISA Kit

CATALOG #
AAA93020

REACTIVITY
Monkey

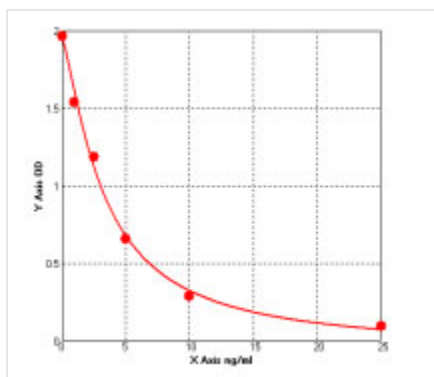

PRODUCT SYNONYMS

Platelet endothelial cell adhesion molecule-1; Monkey Platelet endothelial cell adhesion molecule-1 ELISA Kit; PECAM-1/CD31 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Monkey
Specificity	This assay has high sensitivity and excellent specificity for detection of PECAM1. No significant cross-reactivity or interference between PECAM1 and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between PECAM1 and all the analogues, therefore, cross reaction may still exist in some cases.
Assay Type	Quantitative Competitive
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Sensitivity	0.1 ng/mL
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for PECAM-1/CD31 elisa kit	Principle of the Assay: PECAM1 ELISA kit applies the competitive enzyme immunoassay technique utilizing a polyclonal anti-PECAM1 antibody and an PECAM1-HRP conjugate. The assay sample and buffer are incubated together with PECAM1-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the PECAM1 concentration since PECAM1 from samples and PECAM1-HRP conjugate compete for the anti-PECAM1 antibody binding site. Since the number of sites is limited, as more sites are occupied by PECAM1 from the sample, fewer sites are left to bind PECAM1-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The PECAM1 concentration in each sample is interpolated from this standard curve. Intended Uses: This PECAM1 ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Monkey PECAM1. This ELISA kit for research use only, not for therapeutic or test applications!
