

Monkey Phospho-Nuclear Factor kappa B ELISA Kit | pNFkB elisa kit

Monkey Phospho-Nuclear Factor kappa B ELISA Kit

CATALOG #
AAA93409

REACTIVITY
Monkey

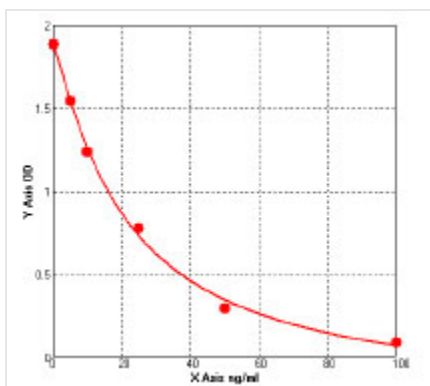

PRODUCT SYNONYMS

Phospho-Nuclear Factor kappa B; Monkey Phospho-Nuclear Factor kappa B ELISA Kit; pNFkB elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Monkey
Samples	Serum, Plasma, Cell Culture Supernatants, Body Fluid And Tissue Homogenate
Assay Type	Quantitative Competitive
Sensitivity	1.0 pg/mL.
Preparation and Storage	Store all reagents at 2-8 degree C.

Intended Uses: This PMP ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Mouse PMP. This ELISA kit for research use only!

Principle of the Assay: PMP ELISA kit applies the competitive enzyme immunoassay technique utilizing a polyclonal anti-PMP antibody and an PMP-HRP conjugate. The assay sample and buffer are incubated together with PMP-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the PMP concentration since PMP from samples and PMP-HRP conjugate compete for the anti-PMP antibody binding site. Since the number of sites is limited, as more sites are occupied by PMP from the sample, fewer sites are left to bind PMP-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The PMP concentration in each sample is interpolated from this standard curve.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
