

Chicken Interleukin 17 ELISA Kit | IL17 elisa kit

Chicken Interleukin 17 ELISA Kit

CATALOG #
AAA93514

REACTIVITY
Chicken

PRODUCT SYNONYMS

Interleukin 17; Chicken Interleukin 17 ELISA Kit; IL17 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Chicken
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Sensitivity	1.0 pg/mL.
Preparation and Storage	Store all reagents at 2-8 degree C

Related Product Information for IL17 elisa kit

Intended Uses: This IL17 ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Chicken IL17. This ELISA kit for research use only!

Principle of the Assay: IL17 ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-IL17 antibody and an IL17-HRP conjugate. The assay sample and buffer are incubated together with IL17-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the IL17 concentration since IL17 from samples and IL17-HRP conjugate compete for the anti-IL17 antibody binding site. Since the number of sites is limited, as more sites are occupied by IL17 from the sample, fewer sites are left to bind IL17-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The IL17 concentration in each sample is interpolated from this standard curve.
