

Canine CarbohydRate Antigen 125 ELISA Kit | CA125 elisa kit

Canine CarbohydRate Antigen 125 ELISA Kit

CATALOG #
AAA93687

REACTIVITY
Canine

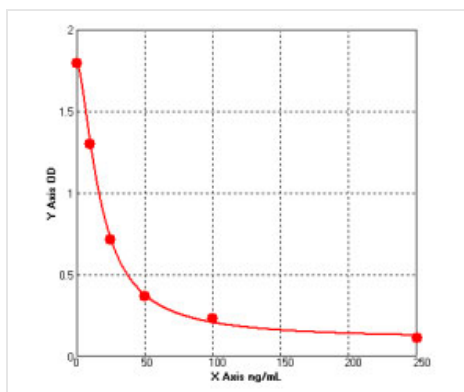

PRODUCT SYNONYMS

CarbohydRate Antigen 125; Canine CarbohydRate Antigen 125 ELISA Kit; CA125 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Canine
Specificity	This assay has high sensitivity and excellent specificity for detection of CA125. No significant cross-reactivity or interference between CA125 and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between CA125 and all the analogues, therefore, cross reaction may still exist in some cases.
Assay Type	Quantitative Competitive
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Sensitivity	1.0 ng/mL
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for CA125 elisa kit	Principle of the Assay: CA125 ELISA kit applies the competitive enzyme immunoassay technique utilizing a polyclonal anti-CA125 antibody and an CA125-HRP conjugate. The assay sample and buffer are incubated together with CA125-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the CA125 concentration since CA125 from samples and CA125-HRP conjugate compete for the anti-CA125 antibody binding site. Since the number of sites is limited, as more sites are occupied by CA125 from the sample, fewer sites are left to bind CA125-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The CA125 concentration in each sample is interpolated from this standard curve. Intended Uses: This CA125 ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Canine CA125. This ELISA kit for research use only, not for therapeutic or test applications!
Product Categories/Family for CA125 elisa kit	Cancer

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
