

Human Estrogen Receptor beta ELISA Kit | ERbeta elisa kit

Human Estrogen Receptor beta ELISA Kit

CATALOG #
AAA93747

REACTIVITY
Human

PRODUCT SYNONYMS

Estrogen Receptor beta; Human Estrogen Receptor beta ELISA Kit; Human Estrogen Receptor b ELISA Kit; ERbeta elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Detection Range	2.5-50ng/mL
Sensitivity	0.1ng/mL
Intended Uses	This ESR2/ERb ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Human ESR2/ERb. This ELISA kit for research use only, not for therapeutic applications!
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for ERbeta elisa kit

Principle of the Assay: ESR2/ERb ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-ESR2/ERb antibody and an ESR2/ERb-HRP conjugate. The assay sample and buffer are incubated together with ESR2/ERb-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the ESR2/ERb concentration since ESR2/ERb from samples and ESR2/ERb-HRP conjugate compete for the anti-ESR2/ERb antibody binding site. Since the number of sites is limited, as more sites are occupied by ESR2/ERb from the sample, fewer sites are left to bind ESR2/ERb-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The ESR2/ERb concentration in each sample is interpolated from this standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	57619192
NCBI GeneID	443066
NCBI Accession #	NP_001009737.1
NCBI GenBank Nucleotide #	NM_001009737.1
Molecular Weight	36,176 Da
NCBI Official Full Name	estrogen receptor beta
NCBI Official Symbol	ESR2
NCBI Official Synonym Symbols	ERB; ERBETA
NCBI Protein Information	estrogen receptor beta; ER-beta; steroid receptor; nuclear receptor subfamily 3 group A member 2
UniProt Protein Name	Estrogen receptor beta
UniProt Gene Name	ESR2
UniProt Synonym Gene Names	NR3A2; ER-beta
UniProt Entry Name	ESR2_SHEEP

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
