

Fish Concanavalin A (ConA) ELISA Kit | ConA elisa kit

Fish Concanavalin A (ConA) ELISA Kit

CATALOG #
AAA93762

REACTIVITY
Fish

PRODUCT SYNONYMS

Concanavalin A (ConA); Fish Concanavalin A (ConA) ELISA Kit; ConA elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Fish
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Sensitivity	0.1 ng/mL.
Preparation and Storage	Store all reagents at 2-8 degree C

ADDITIONAL INFORMATION

Related Product Information for ConA elisa kit

For samples: Serum, plasma, cell culture supernatants, body fluid and tissue homogenate

INTENDED USE This ConA ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Fish ConA . This ELISA kit for research use only!

PRINCIPLE OF THE ASSAY ConA ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-ConA antibody and an ConA-HRP conjugate. The assay sample and buffer are incubated together with ConA-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the ConA concentration since ConA from samples and ConA-HRP conjugate compete for the anti-ConA antibody binding site. Since the number of sites is limited, as more sites are occupied by ConA from the sample, fewer sites are left to bind ConA-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The ConA concentration in each sample is interpolated from this standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	15824660
NCBI Official Full Name	concanavalin A

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
