

Goat Lung cancer marker ELISA Kit

Goat Lung cancer marker ELISA Kit

CATALOG #
AAA93844

REACTIVITY
Goat

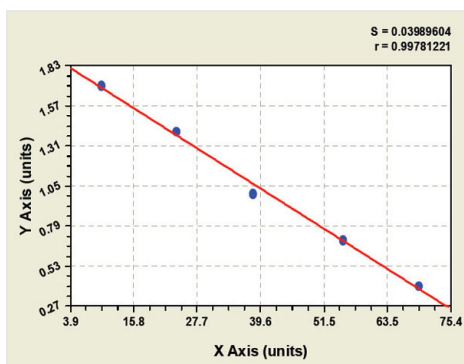

PRODUCT SYNONYMS

Lung cancer marker; Goat Lung cancer marker ELISA Kit; Lung cancer marker elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Goat
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Sensitivity	0.1 ng/mL.
Intended Uses	This Lung cancer marker ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Goat Lung cancer marker. This ELISA kit for research use only, not for therapeutic applications!
Preparation and Storage	Store all reagents at 2-8 degree C

ADDITIONAL INFORMATION

Related Product Information for Lung cancer marker elisa kit

Principle of the Assay: Lung cancer marker ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-Lung cancer marker antibody and an Lung cancer marker-HRP conjugate. The assay sample and buffer are incubated together with Lung cancer marker-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the Lung cancer marker concentration since Lung cancer marker from samples and Lung cancer marker-HRP conjugate compete for the anti-Lung cancer marker antibody binding site. Since the number of sites is limited, as more sites are occupied by Lung cancer marker from the sample, fewer sites are left to bind Lung cancer marker-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The Lung cancer marker concentration in each sample is interpolated from this standard curve.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
