

Sheep Complement component 3b ELISA Kit | C3b elisa kit

Sheep Complement component 3b ELISA Kit

CATALOG #
AAA93879

REACTIVITY
Sheep

PRODUCT SYNONYMS

Complement component 3b; Sheep Complement component 3b ELISA Kit; C3b elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Sheep
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Sandwich
Sensitivity	1.0 ng/mL.
Preparation and Storage	Store all reagents at 2-8 degree C.

Intended Uses: This C3b ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Sheep C3b. This ELISA kit for research use only!

Principle of the Assay: C3b ELISA kit applies the quantitative sandwich enzyme immunoassay technique. The microtiter plate has been pre-coated with a monoclonal antibody specific for C3b. Standards or samples are then added to the microtiter plate wells and C3b if present, will bind to the antibody pre-coated wells. In order to quantitatively determine the amount of C3b present in the sample, a standardized preparation of horseradish peroxidase (HRP)-conjugated polyclonal antibody, specific for C3b are added to each well to "sandwich" the C3b immobilized on the plate. The microtiter plate undergoes incubation, and then the wells are thoroughly washed to remove all unbound components. Next, substrate solutions are added to each well. The enzyme (HRP) and substrate are allowed to react over a short incubation period. Only those wells that contain C3b and enzyme-conjugated antibody will exhibit a change in color. The enzyme-substrate reaction is terminated by addition of a sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450 nm. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The C3b concentration in each sample is interpolated from this standard curve.

Product Categories/Family for C3b elisa kit

Immunology

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
