

Rabbit RhoA Protein ELISA Kit | RhoA elisa kit

Rabbit RhoA Protein ELISA Kit

CATALOG #
AAA93898

REACTIVITY
Rabbit

PRODUCT SYNONYMS

RhoA Protein; Rabbit RhoA Protein ELISA Kit; RhoA elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Rabbit
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Sensitivity	0.1 ng/mL.
Preparation and Storage	Store all reagents at 2-8 degree C.

Related Product Information for RhoA elisa kit

Intended Uses: This RhoA ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Rabbit RhoA. This ELISA kit for research use only!

Principle of the Assay: RhoA ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-RhoA antibody and an RhoA-HRP conjugate. The assay sample and buffer are incubated together with RhoA-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the RhoA concentration since RhoA from samples and RhoA-HRP conjugate compete for the anti-RhoA antibody binding site. Since the number of sites is limited, as more sites are occupied by RhoA from the sample, fewer sites are left to bind RhoA-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The RhoA concentration in each sample is interpolated from this standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	1680371
NCBI Official Full Name	rhoA protein

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
