

Rat Pro-Gastrin Releasing Peptide ELISA Kit | proGRP elisa kit

Rat Pro-Gastrin Releasing Peptide ELISA Kit

CATALOG #
AAA93937

REACTIVITY
Rat

PRODUCT SYNONYMS

Pro-Gastrin Releasing Peptide; Rat Pro-Gastrin Releasing Peptide ELISA Kit; proGRP elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Rat
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Sensitivity	1.0 pg/mL.
Preparation and Storage	Store all reagents at 2-8 degree C.

Related Product Information for proGRP elisa kit

Intended Uses: This proGRP ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Rat proGRP. This ELISA kit for research use only!

Principle of the Assay: proGRP ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-proGRP antibody and an proGRP-HRP conjugate. The assay sample and buffer are incubated together with proGRP-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the proGRP concentration since proGRP from samples and proGRP-HRP conjugate compete for the anti-proGRP antibody binding site. Since the number of sites is limited, as more sites are occupied by proGRP from the sample, fewer sites are left to bind proGRP-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The proGRP concentration in each sample is interpolated from this standard curve.
