

Rat Integrin beta4 ELISA Kit | ITGbeta4 elisa kit

Rat Integrin beta4 ELISA Kit

CATALOG #
AAA93979

REACTIVITY
Rat

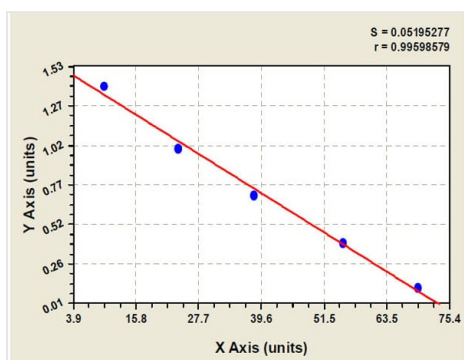

PRODUCT SYNONYMS

Integrin beta4; Rat Integrin beta4 ELISA Kit; Rat Integrin b4 ELISA Kit; ITGbeta4 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Rat
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Sensitivity	0.1 ng/mL.
Preparation and Storage	Store all reagents at 2-8 degree C.

Intended Uses: This ITGbeta4 ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Rat ITGbeta4. This ELISA kit for research use only!

Principle of the Assay: ITGbeta4 ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-ITGbeta4 antibody and an ITGbeta4-HRP conjugate. The assay sample and buffer are incubated together with ITGbeta4-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the ITGbeta4 concentration since ITGbeta4 from samples and ITGbeta4-HRP conjugate compete for the anti-ITGbeta4 antibody binding site. Since the number of sites is limited, as more sites are occupied by ITGbeta4 from the sample, fewer sites are left to bind ITGbeta4-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The ITGbeta4 concentration in each sample is interpolated from this standard curve.
