

Bovine Low molecular weight heparin ELISA Kit | LMWH elisa kit

Bovine Low molecular weight heparin ELISA Kit

CATALOG #
AAA94044

REACTIVITY
Bovine

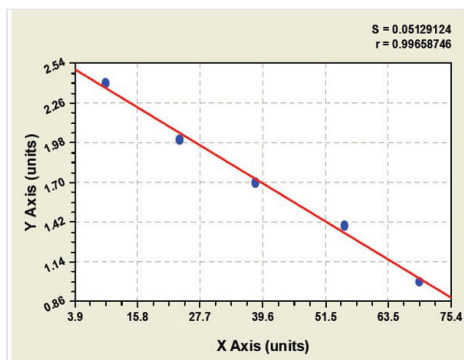

PRODUCT SYNONYMS

Low molecular weight heparin; Bovine Low molecular weight heparin ELISA Kit; LMWH elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Bovine
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Intended Uses	This LMWH ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Bovine LMWH. This ELISA kit for research use only, not for therapeutic applications
Intended Uses	This LMWH ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Bovine LMWH. This ELISA kit for research use only, not for therapeutic applications!
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for LMWH elisa kit

Principle of the Assay: LMWH ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-LMWH antibody and an LMWH-HRP conjugate. The assay sample and buffer are incubated together with LMWH-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the LMWH concentration since LMWH from samples and LMWH-HRP conjugate compete for the anti-LMWH antibody binding site. Since the number of sites is limited, as more sites are occupied by LMWH from the sample, fewer sites are left to bind LMWH-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The LMWH concentration in each sample is interpolated from this standard curve.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
