

Monkey Immunoglobulin G2 ELISA Kit | IgG2 elisa kit

Monkey Immunoglobulin G2 ELISA Kit

CATALOG #
AAA94380

REACTIVITY
Monkey

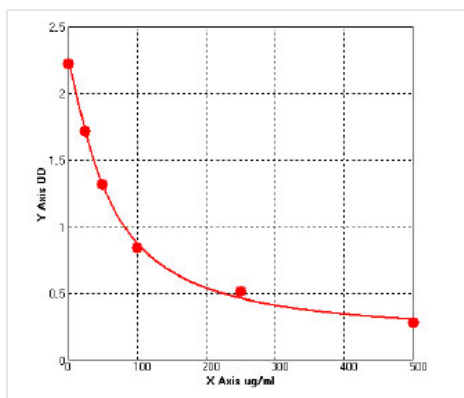

PRODUCT SYNONYMS

Immunoglobulin G2; Monkey Immunoglobulin G2 ELISA Kit; IgG2 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Monkey
Specificity	This assay has high sensitivity and excellent specificity for detection of IgG2. No significant cross-reactivity or interference between IgG2 and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between IgG2 and all the analogues, therefore, cross reaction may still exist in some cases.
Assay Type	Quantitative Competitive
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Sensitivity	1.0 ug/mL
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for IgG2 elisa kit	Principle of the Assay: IgG2 ELISA kit applies the competitive enzyme immunoassay technique utilizing a polyclonal anti-IgG2 antibody and an IgG2-HRP conjugate. The assay sample and buffer are incubated together with IgG2-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the IgG2 concentration since IgG2 from samples and IgG2-HRP conjugate compete for the anti-IgG2 antibody binding site. Since the number of sites is limited, as more sites are occupied by IgG2 from the sample, fewer sites are left to bind IgG2-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The IgG2 concentration in each sample is interpolated from this standard curve. Intended Uses: This IgG2 ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Monkey IgG2. This ELISA kit for research use only, not for therapeutic or test applications!
Product Categories/Family for IgG2 elisa kit	Immunology

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
