

Rabbit Phosphorylated Adrenocorticotrophic Hormone receptor ELISA Kit | PACTHR elisa kit

Rabbit Phosphorylated Adrenocorticotrophic Hormone receptor ELISA Kit

CATALOG #
AAA94416

REACTIVITY
Rabbit

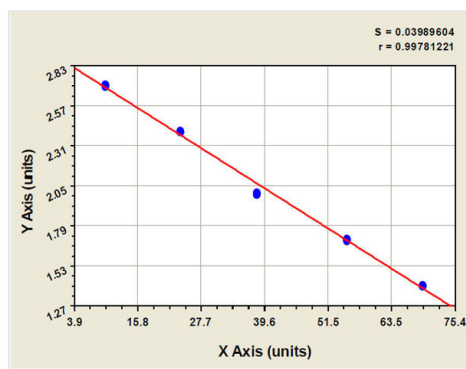

PRODUCT SYNONYMS

Phosphorylated Adrenocorticotrophic Hormone receptor; Rabbit Phosphorylated Adrenocorticotrophic Hormone receptor ELISA Kit; PACTHR elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Rabbit
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Sensitivity	1.0 pg/mL.
Intended Uses	This P-MC2R ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Rabbit P-MC2R. This ELISA kit for research use only, not for therapeutic applications!
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for PACTHR elisa kit

Principle of the assay: P-MC2R ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-P-MC2R antibody and an P-MC2R-HRP conjugate. The assay sample and buffer are incubated together with P-MC2R-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the P-MC2R concentration since P-MC2R from samples and P-MC2R-HRP conjugate compete for the anti-P-MC2R antibody binding site. Since the number of sites is limited, as more sites are occupied by P-MC2R from the sample, fewer sites are left to bind P-MC2R-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The P-MC2R concentration in each sample is interpolated from this standard curve.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
