

Bovine Squamous Cell Carcinoma related antigen ELISA Kit | SCCA elisa kit

Bovine Squamous Cell Carcinoma related antigen ELISA Kit

CATALOG #
AAA94426

REACTIVITY
Bovine

PRODUCT SYNONYMS

Squamous Cell Carcinoma related antigen; Bovine Squamous Cell Carcinoma related antigen ELISA Kit; SCCA elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Bovine
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Detection Range	1.0-25ng/mL
Sensitivity	0.1ng/mL
Intended Uses	This SCCA ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Bovine SCCA. This ELISA kit for research use only, not for therapeutic applications!
Preparation and Storage	Store all reagents at 2-8 degree C.

Related Product Information for SCCA elisa kit

Principle of the assay: SCCA ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-SCCA antibody and an SCCA-HRP conjugate. The assay sample and buffer are incubated together with SCCA-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the SCCA concentration since SCCA from samples and SCCA-HRP conjugate compete for the anti-SCCA antibody binding site. Since the number of sites is limited, as more sites are occupied by SCCA from the sample, fewer sites are left to bind SCCA-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The SCCA concentration in each sample is interpolated from this standard curve.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
