

Porcine Poly Serium Antigen ELISA Kit | PHSA elisa kit

Porcine Poly Serium Antigen ELISA Kit

CATALOG #
AAA94642

REACTIVITY
Porcine

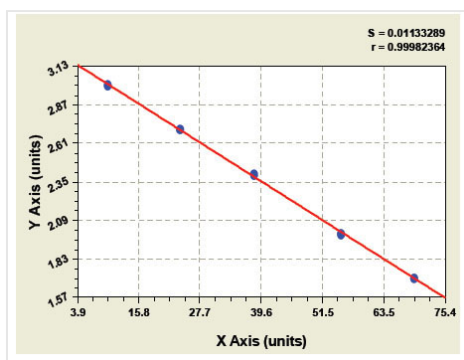

PRODUCT SYNONYMS

Poly Serium Antigen; Porcine Poly Serium Antigen ELISA Kit; PHSA elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Porcine
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Detection Range	50-1000ng/mL
Sensitivity	0.1ng/mL
Intended Uses	This PHSA ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Porcine PHSA. This ELISA kit for research use only, not for therapeutic applications
!Intended Uses	This PHSA ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Porcine PHSA. This ELISA kit for research use only, not for therapeutic applications!
Preparation and Storage	Store all reagents at 2-8 degree C.

Related Product Information for PHSA elisa kit

Principle of the Assay: PHSA ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-PHSA antibody and an PHSA-HRP conjugate. The assay sample and buffer are incubated together with PHSA-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the PHSA concentration since PHSA from samples and PHSA-HRP conjugate compete for the anti-PHSA antibody binding site. Since the number of sites is limited, as more sites are occupied by PHSA from the sample, fewer sites are left to bind PHSA-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The PHSA concentration in each sample is interpolated from this standard curve.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
