

Monkey Nav1.7 ELISA Kit | Nav1.7 elisa kit

Monkey Nav1.7 ELISA Kit

CATALOG #
AAA94674

REACTIVITY
Monkey

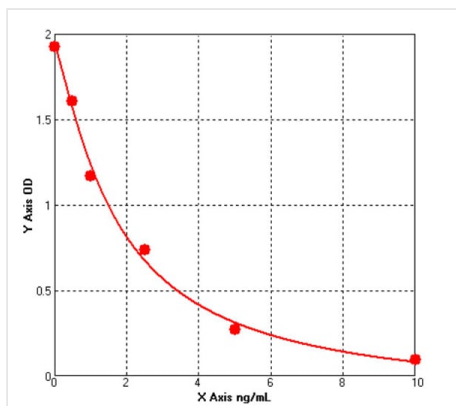

PRODUCT SYNONYMS

Nav1.7; Monkey Nav1.7 ELISA Kit; Nav1.7 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Monkey
Specificity	This assay has high sensitivity and excellent specificity for detection of Nav1.7. No significant cross-reactivity or interference between Nav1.7 and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between Nav1.7 and all the analogues, therefore, cross reaction may still exist in some cases.
Assay Type	Quantitative Competitive
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Sensitivity	0.1 ng/mL
Intended Uses	This Nav1.7 ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Monkey Nav1.7. This ELISA kit for research use only, not for therapeutic applications!
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for Nav1.7 elisa kit	Principle of the Assay: Nav1.7 ELISA kit applies the competitive enzyme immunoassay technique utilizing an anti-Nav1.7 antibody and an Nav1.7-HRP conjugate. The assay sample and buffer are incubated together with Nav1.7-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the Nav1.7 concentration since Nav1.7 from samples and Nav1.7-HRP conjugate compete for the anti-Nav1.7 antibody binding site. Since the number of sites is limited, as more sites are occupied by Nav1.7 from the sample, fewer sites are left to bind Nav1.7-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The Nav1.7 concentration in each sample is interpolated from this standard curve. Intended Uses: This Nav1.7 ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Monkey Nav1.7. This ELISA kit for research use only, not for therapeutic or test applications!

NCBI AND UNIPROT INFORMATION

NCBI GI #	18073671
UniProt Accession #	Q15858; Q6B4R9; Q6B4S0; Q6B4S1; Q70HX1; Q70HX2; Q8WTU1; Q8WWN4; A1BUH5
Molecular Weight	225,227 Da
NCBI Official Full Name	Nav1.7, partial
UniProt Protein Name	Sodium channel protein type 9 subunit alpha
UniProt Gene Name	SCN9A
UniProt Synonym Gene Names	NENA; hNE-Na; PN1
UniProt Entry Name	SCN9A_HUMAN

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
