

Bovine Sex Determining Region Y Box Protein 9 ELISA Kit | SOX9 elisa kit

Bovine Sex Determining Region Y Box Protein 9 ELISA Kit

CATALOG #
AAA94744

REACTIVITY
Bovine

PRODUCT SYNONYMS

Sex Determining Region Y Box Protein 9; Bovine Sex Determining Region Y Box Protein 9 ELISA Kit; SOX9 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Bovine
Specificity	This assay has high sensitivity and excellent specificity for detection of SOX9. No significant cross-reactivity or interference between SOX9 and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between SOX9 and all the analogues, therefore, cross reaction may still exist in some cases.
Assay Type	Quantitative Competitive
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Sensitivity	0.1 ng/mL
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for SOX9 elisa kit

Principle of the Assay: SOX9 ELISA kit applies the competitive enzyme immunoassay technique utilizing an anti-SOX9 antibody and an SOX9-HRP conjugate. The assay sample and buffer are incubated together with SOX9-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the SOX9 concentration since SOX9 from samples and SOX9-HRP conjugate compete for the anti-SOX9 antibody binding site. Since the number of sites is limited, as more sites are occupied by SOX9 from the sample, fewer sites are left to bind SOX9-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The SOX9 concentration in each sample is interpolated from this standard curve.

Intended Uses: This SOX9 ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Bovine SOX9. This ELISA kit for research use only, not for therapeutic or test applications!
