

Bovine Growth-regulated nocogenea/melanoma growth stimulating ELISA Kit | GROa / MGSA elisa kit

Bovine Growth-regulated nocogenea/melanoma growth stimulating ELISA Kit

CATALOG # AAA94867	REACTIVITY Bovine
------------------------------	-----------------------------

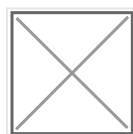

PRODUCT SYNONYMS

Growth-regulated nocogenea/melanoma growth stimulating; Bovine Growth-regulated nocogenea/melanoma growth stimulating ELISA Kit; GROa / MGSA elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Bovine
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Assay Type	Competitive (Quantitative)
Sensitivity	0.1 ng/mL.
Preparation and Storage	Store all reagents at 2-8 degree C

Standard Curve (Sample)

ADDITIONAL INFORMATION

Related Product Information for GROa / MGSA elisa kit	Intended Uses: This GRO/MGSA ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Bovine GRO/MGSA. This ELISA kit for research use only! Principle of the Assay: GRO/MGSA ELISA kit applies the competitive enzyme immunoassay technique utilizing a Polyclonal anti-GRO/MGSA antibody and an GRO/MGSA-HRP conjugate. The assay sample and buffer are incubated together with GRO/MGSA-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the GRO/MGSA concentration since GRO/MGSA from samples and GRO/MGSA-HRP conjugate compete for the anti-GRO/MGSA antibody binding site. Since the number of sites is limited, as more sites are occupied by GRO/MGSA from the sample, fewer sites are left to bind GRO/MGSA-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The GRO/MGSA concentration in each sample is interpolated from this standard curve.
Product Categories/Family for GROa / MGSA elisa kit	Cancer

NCBI AND UNIPROT INFORMATION

NCBI GI #	4504153
NCBI GeneID	2919

NCBI Accession #	NP_001502.1
NCBI GenBank Nucleotide #	NM_001511.3
UniProt Accession #	P09341 ; Q9UCR7
Molecular Weight	11,301 Da
NCBI Official Full Name	growth-regulated alpha protein
NCBI Official Synonym Full Names	chemokine (C-X-C motif) ligand 1 (melanoma growth stimulating activity, alpha)
NCBI Official Symbol	CXCL1
NCBI Official Synonym Symbols	FSP; GRO1; GROa; MGSA; NAP-3; SCYB1; MGSA-a
NCBI Protein Information	growth-regulated alpha protein; MGSA alpha; GRO-alpha(1-73); C-X-C motif chemokine 1; fibroblast secretory protein; neutrophil-activating protein 3; melanoma growth stimulatory activity alpha; GRO1 oncogene (melanoma growth-stimulating activity); GRO1 oncogene (melanoma growth stimulating activity, alpha)
UniProt Protein Name	Growth-regulated alpha protein
UniProt Gene Name	CXCL1
UniProt Synonym Gene Names	GRO; GRO1; GROA; MGSA; SCYB1; MGSA; NAP-3
UniProt Entry Name	GROA_HUMAN

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
