

Bovine Free cholesterol ELISA Kit | FCHOL elisa kit

Bovine Free cholesterol ELISA Kit

CATALOG #
AAA94872

REACTIVITY
Bovine

PRODUCT SYNONYMS

Free cholesterol; Bovine Free cholesterol ELISA Kit; FCHOL elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Bovine
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Intended Uses	This FCHOL ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Bovine FCHOL. This ELISA kit for research use only, not for therapeutic applications
Intended Uses	This FCHOL ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Bovine FCHOL. This ELISA kit for research use only, not for therapeutic applications!
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for FCHOL elisa kit

Principle of the Assay: FCHOL ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-FCHOL antibody and an FCHOL-HRP conjugate. The assay sample and buffer are incubated together with FCHOL-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the FCHOL concentration since FCHOL from samples and FCHOL-HRP conjugate compete for the anti-FCHOL antibody binding site. Since the number of sites is limited, as more sites are occupied by FCHOL from the sample, fewer sites are left to bind FCHOL-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The FCHOL concentration in each sample is interpolated from this standard curve.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
