

Monkey Interferon Antibody ELISA Kit | IFN elisa kit

Monkey Interferon Antibody ELISA Kit

CATALOG # AAA94906	REACTIVITY Monkey
------------------------------	-----------------------------

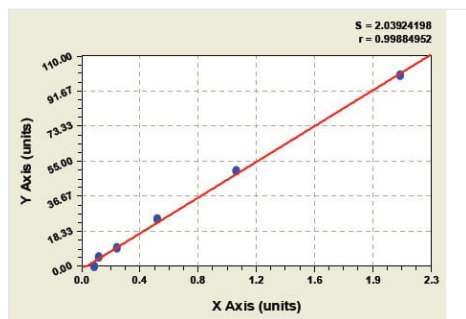

PRODUCT SYNONYMS

Interferon Antibody; Monkey Interferon Antibody ELISA Kit; IFN elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Monkey
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Sandwich
Intended Uses	This IFN- Ab ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Monkey IFN- Ab. This ELISA kit for research use only, not for therapeutic applications
Intended Uses	This IFN- Ab ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Monkey IFN- Ab. This ELISA kit for research use only, not for therapeutic applications!
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for IFN elisa kit	Principle of the Assay: IFN- Ab ELISA kit applies the quantitative sandwich enzyme immunoassay technique. The microtiter plate has been pre-coated with a monoclonal antibody specific for IFNAb. Standards or samples are then added to the microtiter plate wells and IFN- Ab if present, will bind to the antibody pre-coated wells. In order to quantitatively determine the amount of IFN- Ab present in the sample, a standardized preparation of horseradish peroxidase (HRP)-conjugated polyclonal antibody, specific for IFN- Ab are added to each well to "sandwich" the IFN- Ab immobilized on the plate. The microtiter plate undergoes incubation, and then the wells are thoroughly washed to remove all unbound components. Next, substrate solutions are added to each well. The enzyme (HRP) and substrate are allowed to react over a short incubation period. Only those wells that contain IFN- Ab and enzyme-conjugated antibody will exhibit a change in color. The enzyme-substrate reaction is terminated by addition of a sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450 nm. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The IFN- Ab concentration in each sample is interpolated from this standard curve.
Product Categories/Family for IFN elisa kit	Cancer

NCBI AND UNIPROT INFORMATION

NCBI GI #	32719
NCBI GeneID	3442
UniProt Accession #	P01569; Q52LX3
Molecular Weight	21,942 Da
NCBI Official Full Name	interferon, partial
NCBI Official Synonym Full Names	interferon, alpha 5
NCBI Official Symbol	IFNA5
NCBI Official Synonym Symbols	INA5; INFA5; leIF G; IFN-alphaG; IFN-alpha-5
NCBI Protein Information	interferon alpha-5; interferon alpha-G; interferon alpha-61
UniProt Protein Name	Interferon alpha-5
UniProt Gene Name	IFNA5
UniProt Synonym Gene Names	IFN-alpha-5; LeIF G
UniProt Entry Name	IFNA5_HUMAN

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
