

Chicken Calnexin ELISA Kit | CNX elisa kit

Chicken Calnexin ELISA Kit

CATALOG # AAA94915	REACTIVITY Chicken
------------------------------	------------------------------

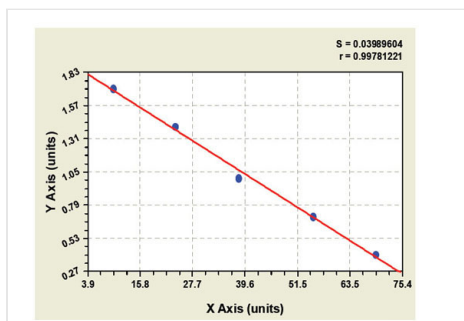

PRODUCT SYNONYMS

Calnexin; Chicken Calnexin ELISA Kit; CNX elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Chicken
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Intended Uses	This Calnexin ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Chicken Calnexin. This ELISA kit for research use only, not for therapeutic applications
Intended Uses	This Calnexin ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Chicken Calnexin. This ELISA kit for research use only, not for therapeutic applications!
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for CNX elisa kit	Principle of the Assay: Calnexin ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-Calnexin antibody and an Calnexin-HRP conjugate. The assay sample and buffer are incubated together with Calnexin-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the Calnexin concentration since Calnexin from samples and Calnexin-HRP conjugate compete for the anti-Calnexin antibody binding site. Since the number of sites is limited, as more sites are occupied by Calnexin from the sample, fewer sites are left to bind Calnexin-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The Calnexin concentration in each sample is interpolated from this standard curve.
Product Categories/Family for CNX elisa kit	Epigenetics and Nuclear Signaling

NCBI AND UNIPROT INFORMATION

NCBI GI #	186523
NCBI GeneID	821
Molecular Weight	55,598 Da
NCBI Official Full Name	calnexin
NCBI Official Synonym Full Names	calnexin
NCBI Official Symbol	CANX
NCBI Official Synonym Symbols	CNX; P90; IP90
NCBI Protein Information	calnexin; major histocompatibility complex class I antigen-binding protein p88
UniProt Protein Name	Calnexin
UniProt Gene Name	CANX
UniProt Entry Name	CALX_HUMAN

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
