

Mouse Anti-Bromodeoxyuridine antibody ELISA Kit | BrdU elisa kit

Mouse Anti-Bromodeoxyuridine antibody ELISA Kit

CATALOG #
AAA95535

REACTIVITY
Mouse

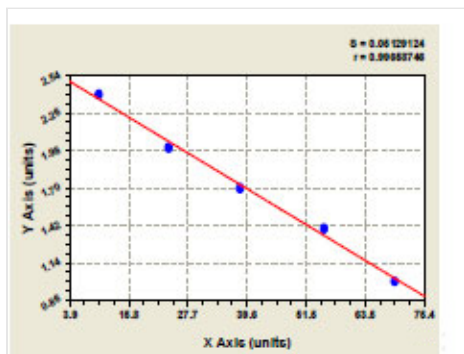

PRODUCT SYNONYMS

Anti-Bromodeoxyuridine antibody; Mouse Anti-Bromodeoxyuridine antibody ELISA Kit; BrdU elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Detection Range	5-100ng/mL
Sensitivity	1.0ng/mL
Preparation and Storage	Store all reagents at 2-8 degree C.

Related Product Information for BrdU elisa kit

Intended Uses: This Anti-BrdU ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Mouse Anti-BrdU.

Principle of the Assay: Anti-BrdU ELISA kit applies the competitive enzyme immunoassay technique utilizing a BrdU antigen and an Anti-BrdU-HRP conjugate. The assay sample and buffer are incubated together with Anti-BrdU-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the Anti-BrdU concentration since Anti-BrdU from samples and Anti-BrdU-HRP conjugate compete for the BrdU antigen binding site. Since the number of sites is limited, as more sites are occupied by Anti-BrdU from the sample, fewer sites are left to bind Anti-BrdU-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The Anti-BrdU concentration in each sample is interpolated from this standard curve.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
