

Rat Soluble programmed death-1 ELISA Kit | sPD-1 elisa kit

Rat Soluble programmed death-1 ELISA Kit

CATALOG #
AAA95538

REACTIVITY
Rat

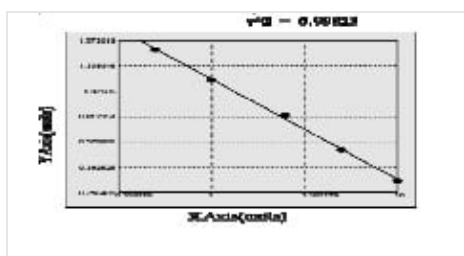

PRODUCT SYNONYMS

Soluble programmed death-1; Rat Soluble programmed death-1 ELISA Kit; sPD-1 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Rat
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Sensitivity	0.1 ng/mL.
Preparation and Storage	Store all reagents at 2-8 degree C

Intended Uses: This sPD-1 ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Rat sPD-1. This ELISA kit for research use only!

Principle of the Assay||sPD-1 ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-sPD-1 antibody and an sPD-1-HRP conjugate. The assay sample and buffer are incubated together with sPD-1-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the sPD-1 concentration since sPD-1 from samples and sPD-1-HRP conjugate compete for the anti-sPD-1 antibody binding site. Since the number of sites is limited, as more sites are occupied by sPD-1 from the sample, fewer sites are left to bind sPD-1-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The sPD-1 concentration in each sample is interpolated from this standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	55976933
NCBI GeneID	171683
NCBI Official Full Name	SPD-1
NCBI Official Symbol	spd-1
NCBI Protein Information	Protein SPD-1

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
