

Rat Total Endothelin ELISA Kit | ET elisa kit

Rat Total Endothelin ELISA Kit

CATALOG #
AAA95575

REACTIVITY
Rat

PRODUCT SYNONYMS

Total Endothelin; Rat Total Endothelin ELISA Kit; Rat ET ELISA Kit; ET ELISA Kit; ET elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Rat
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Sensitivity	1.0 pg/mL.
Intended Uses	This ET ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Rat ET. This ELISA kit for research use only, not for therapeutic applications!
Preparation and Storage	Store all reagents at 2-8 degree C

ADDITIONAL INFORMATION

Related Product Information for ET elisa kit

Principle of the assay: ET ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-ET antibody and an ET-HRP conjugate. The assay sample and buffer are incubated together with ET-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the ET concentration since ET from samples and ET-HRP conjugate compete for the anti-ET antibody binding site. Since the number of sites is limited, as more sites are occupied by ET from the sample, fewer sites are left to bind ET-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The ET concentration in each sample is interpolated from this standard curve.
