

Rabbit Nuclear Matrix Protein 66 ELISA Kit | NMP66 elisa kit

Rabbit Nuclear Matrix Protein 66 ELISA Kit

CATALOG #
AAA95755

REACTIVITY
Rabbit

PRODUCT SYNONYMS

Nuclear Matrix Protein 66; Rabbit Nuclear Matrix Protein 66 ELISA Kit; NMP66 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Rabbit
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Intended Uses	This NMP66 ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Rabbit NMP66. This ELISA kit for research use only, not for therapeutic applications
Intended Uses	This NMP66 ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Rabbit NMP66. This ELISA kit for research use only, not for therapeutic applications!
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for NMP66 elisa kit

Principle of the Assay: NMP66 ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-NMP66 antibody and an NMP66-HRP conjugate. The assay sample and buffer are incubated together with NMP66-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the NMP66 concentration since NMP66 from samples and NMP66-HRP conjugate compete for the anti-NMP66 antibody binding site. Since the number of sites is limited, as more sites are occupied by NMP66 from the sample, fewer sites are left to bind NMP66-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The NMP66 concentration in each sample is interpolated from this standard curve.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
